

# VIOLET ACHIENG

Nairobi

achiengviolet381@gmail.com • (+254) 0742953000

Entry-level **Cybersecurity Analyst** with hands-on experience in threat detection, system enumeration, and incident investigation through practical labs and CTF challenges. Skilled in analyzing security events, identifying attack patterns, and performing initial triage of alerts. Strong foundation in networking (CCNA), Linux systems, and common attack vectors including brute-force, privilege escalation, and phishing techniques. Highly detail-oriented with a strong interest in **SOC operations, SIEM monitoring, and incident response within high-availability environments such as banking systems.**

## WORK EXPERIENCE

### Promze Store • 09/2025 – 11/2025

#### Data Encoder & Reconciliation Assistant

- Validated and reconciled 500+ transaction records, improving data accuracy and consistency
- Detected anomalies in transactional and supplier records, improving data integrity
- Maintained structured datasets to support reporting and decision-making
- Developed a comprehensive audit trail system for incident responses, which improved regulatory compliance and facilitated easier tracking of security events within 6 months.

### Adept College • 05/2024 – 08/2024

#### Cybersecurity & Programming Intern

- Facilitated 10+ hands-on cybersecurity lab sessions using Nmap, Hydra, and covering networking, enumeration, and secure coding
- Resolved lab issues for 20+ learners, improving session continuity and completion rates
- Reinforced secure coding and vulnerability awareness through guided exercises and demos
- Led the levelling of cybersecurity tools across the team, resulting in improved collaboration and a 25% increase in threat detection accuracy within 6 months.

## CERTIFICATIONS

### TryHackMe – Pre-Security Path • 01/2026

TryHackMe

### CCNA1: Introduction to Networks • 01/2024

Cisco Networking Academy

## SKILLS

**Security Tools:** Burp Suite, Ghidra, Hydra, Metasploit, Nmap, Wireshark

**Cybersecurity:** brute-force attacks, Enumeration, privilege escalation, vulnerability analysis

**Networking:** routing & switching (CCNA), subnetting, TCP/IP

**Cloud & Systems:** Docker (containerization & environment isolation), Linux

**Programming:** Python, SQL

## EDUCATION

### BSc. Mathematics & Computer Science

Kirinyaga University  
01/2021 – 01/2025

Second Class Upper Division

## CCNA2: Switching, Routing & Wireless Essentials • 01/2024

Cisco Networking Academy

## Docker Fundamentals • 01/2024

Microsoft Learn

## GitHub Foundations • 01/2024

GitHub

### PROJECTS

#### Security Monitoring & Exploitation Labs

TryHackMe

- Simulated real-world attack scenarios including **SMB exploitation, brute-force attacks, and privilege escalation**
- Identified vulnerabilities using Nmap and validated exploits via Metasploit
- Practiced **initial alert analysis and classification of attack severity**
- Strengthened understanding of attacker behavior and detection indicators

#### Basic Pentesting & Incident Analysis Lab

- Enumerated services (HTTP, SMB, SSH) and identified exposed attack surfaces
- Performed **brute-force attack detection scenarios** using Hydra
- Analyzed compromised systems and traced attack paths (recon → exploit → escalate)
- Practiced identifying indicators of compromise (IOCs)

#### Reverse Engineering & Malware Analysis

CrackMe

- Analyzed binaries using Ghidra to identify hidden logic and vulnerabilities
- Interpreted program behavior and extracted sensitive data without execution
- Built analytical thinking required for **threat investigation and malware analysis**
